

Kseniya Savostikova

QA Engineer (Middle, Manual)

St. Petersburg, Russia · on-site / hybrid / remote · open to occasional business trips

+7 962 700-47-31 (preferred) · kseniyahart@gmail.com · t.me/Bolt_reznoj · kseniyaid.github.io/kseniya-savostikova-qa

SUMMARY

QA Engineer with 4+ years in manual testing across product and client-facing development, 6+ years of total professional experience. Comfortable as the single quality checkpoint for several products at once, owning the full testing cycle and keeping a bi-weekly release cadence. Strongest in manual testing of complex web products (LMS, course builders), test design and defect management. Currently learning test automation and ready to grow it within a team.

EXPERIENCE

QA Engineer / QA Manual Engineer (Middle)

June 2023 — July 2026 · 3 yrs 2 mos

Imagespark · St. Petersburg · IT, system integration, software development

Sole QA Engineer on product projects: 3 products in a regular week, up to 5 at peak. Main product — an LMS and e-learning course builder; additionally a demo environment, a transcription service, e-commerce and support work.

- Ran the full manual QA cycle: requirements analysis, test design, functional, regression, integration and non-functional testing, pre-production checks.
- Supported the release process: planned releases every two weeks at the end of the sprint, plus unplanned support releases across several products in parallel.
- Took over current and new projects after the QA team was reduced, keeping delivery dates and quality control intact.
- Acted as the main QA for the LMS and the builder: complex user scenarios, cross-module integrations, catching defect risks before production.
- Wrote and maintained test documentation — test cases and checklists; reported defects and followed them through to a fix in the bug tracker.
- Worked cross-functionally with developers and the product team, holding quality steady while several products moved at once.

Tools: Postman, API testing, SQL, PostgreSQL, Git, Chrome DevTools, HTML, CSS, Figma, TestIT, Kiwi TCMS, YouTrack, JSON, XML, Portainer, Agile, Scrum.

Junior QA Engineer

July 2022 — July 2023 · 1 yr 1 mo

Alee Software · St. Petersburg

Enterprise software testing for large clients: Nornickel, Russian Helicopters, the Russian Football Union, Krastsvetmet, TMK.

- Functional testing of frontend and backend (black box / grey box).
- Created test plans and test cases, ran regression, filed bug reports and tracked defects through to a fix.
- Tested APIs and server responses (JSON, XML), analysed logs, worked with PostgreSQL / MySQL / MS SQL databases.
- Took part in checks on test benches and client VM environments.
- Worked with developers on bug reproduction and clarified requirements against specifications.
- Prepared test result reports.

Tools: Kiwi TCMS, YouTrack, Postman, SoapUI, pgAdmin, SQL Server Management Studio, PuTTY, WinSCP, GlassFish, build server, XenCenter, VS Code.

QA Tester (project work)

May 2022 — June 2022 · 2 mos

Novy Shag · Moscow

- Website testing.
- Test documentation — checklists, test cases, bug reports — and a final test report.

Quality Control Manager

December 2018 — June 2021 · 2 yrs 7 mos

IP Sarkisov Yu. L. · St. Petersburg

- Handled customer requests in 1C according to company regulations and kept internal reporting.
- Checked other departments' work against requirements and reported results to management.
- Ran online customer communication across VK, 2GIS, Flamp, Yandex and Google listings, and supported a Telegram bot.
- Onboarded and trained new employees; resolved conflict situations.
